University of Louisville.

Computer lab assistant for Ying Kit Chan 2006

Math & Computer Information Systems, Fall 2001 – Spring 2002

Bellarmine College, Louisville, KY

Transferred to UofL for graphic design program.

Assumption High School Graduate, May 2001

Awarded art scholarship to take weekend classes at Bellarmine University while in High School. Won art awards all four years for student work and earned college credit in advanced placement classes. Volunteered all four years with special needs children, in nurseries, and in retirement homes.

EXPERIENCE Freelance Web Designer, Louisville, KY,

May 2022–Present

Created and maintaining the website for Patriots Peace Memorial, a local war memorial nonprofit organization.

Created website and print marketing materials for a local hair salon.

Created website, trained students to update the site, and managed hosting for the Communication Arts Technology Program at JCTC.

Adjunct Design Instructor, Jefferson Community & Technical College, Louisville, KY, January 2015–December 2022

Part-time design teacher at the downtown Louisville campus of Jefferson Community and Technical College. Creating lesson plans, projects, and tests for each semester.

Taught students of all ages pursuing design careers and others looking to improve their skills. Worked with students on a practical level, teaching them how to handle design projects that occur in the real world.

Lab Supervisor for the Communication Arts Technology Program, Jefferson Community & Technical College

August 2020–December 2022

Assisted the Program Director with purchasing supplies, inventory, and preparing documents for accounting department. Created online resources and student show galleries during the pandemic for the fall 2020–spring 2022 semesters. Served as point of contact for visitors and provided assistance for students and teachers working with large printers, projectors, Adobe software programs, and photo studio equipment. Supervised and trained student workers.

Web Developer, CBS Interactive and CNET, Louisville, KY

May 2008–December 2009; January 2011 – July 2013

Previously a contracted web developer working specifically with CNET.com within CBS Interactive. Was brought back to the CNET team as a hired-on developer working on projects with reporter editors, designers, and other developers across the country to finish sites within strict deadlines. Worked with proprietary content management system interfaces and APIs to populate sites.

Web Developer & Designer, TMP Worldwide, New Albany, Indiana

September 2005–September 2006; August 2007–April 2008

Worked as a contracted web developer and graphic designer. Designed recruitment advertising for web sites and e-mail systems. Developed sites with teams of designers on multiple projects seamlessly to get the job done within deadlines. Projects involved many Fortune 100 companies such as Microsoft, in addition to the US Navy, Kindred Healthcare, and Monster Worldwide.

Graphic Design Intern, UPS, Louisville, KY

September 2006–August 2007

Contracted intern position within UPS creative media department. Participated in an international branding initiative, implementing strict design specifications on a number of projects. Worked said projects through initial stages to delivery, coordinated jobs with vendors, and assisted other designers in on-going projects and events. Coordinated with the chief designer on the publication of the internal newspaper.
